WAPT : All major changes in 2021

The end of the Community version, the development of a new free version, WAPT 2.0 features ...

Tranquil IT, the WAPT editor, plans many changes for its software in 2021:

– Tranquil IT will **stop the development of WAPT Community**.
– Tranquil IT will create a **new free version**: WAPT Discovery.
– The upcoming release of **WAPT 2.0, based on the Python 3.8 language**.

The end of the development of WAPT Community:

Currently, Tranquil IT can no longer develop or maintain WAPT Community without external contributions. The company has decided to **stop developing WAPT Community beyond version 1.8.2**.

With the upcoming release of WAPT 2.0, the **code for version 1.8.2 will be available on GitHub in read-only mode**. The compiled version of WAPT Community 1.8.2 will no longer be available after this time.

All **offers and support for this version are impacted** by this announcement.

It is important to specify that **Tranquil IT is not opposed to a take over of the project** and has decided to remain **available until June 30, 2021 to answer various questions**.

The creation of WAPT Discovery:

Tranquil IT wishes to **offer a free version** of WAPT to facilitate its discovery. Here are the specificities of WAPT Discovery:

– WAPT Discovery will be **based on WAPT Community** and will exploit the **Python 3.8 language**.
– This version will **not support "Windows XP" and "Mac OS" computers**.
– WAPT Discovery will be a **proprietary version** and will also be **limited to 300 workstations**.

The release of WAPT 2.0:

Version 2.0 of WAPT will be available in the coming weeks. This version should contain:

- Compatibility with the **Python 3.8 language**.
- The **integration of GLPI** to the WAPT console.
- The **management of ACL** (access control list).
- A **multi-server console**.

How to use WAPT in 2021?

In 2021, you will be able to:

- Use WAPT Community 1.8.2 (non-maintained version).
- Use a copy of version 1.8.2 created by the community (not guaranteed by Tranquil IT).
- Use WAPT Discovery for free.
- Use WAPT Enterprise, developed and maintained by Tranquil IT.
